Meet Micro-Air, Inc. - The EasyStart™ 364 People

With **over 50 products in inventory**, Micro-Air continues to be the leader in the Marine and RV industries for air conditioning thermostat controls and electronic soft starters.

About Micro-Air, Inc.

Micro-Air was founded by Andy Spaziani in 1983. He and his wife Bette built the business. Starting from a "garage" operation out of their home, they established their company-owned plant facility in Allentown, NJ.

If you've ever been aboard a pleasure boat, chances are the air conditioning system was being controlled by Micro-Air.

We are very proud of our many original equipment manufacturers. We work very hard every day for all of our customers, no matter who they are.

Brand Relationships...to name just a few

Compatible With...and many other companies

- RISE Award for Innovation and Excellence RVIA's 2019 Show RVX

The Reviews Are In!

I was a little skeptical at first, but I'm very impressed with the EasyStart unit, it will start and run the AC with no trouble. More impressed with the customer service I received, even before I became a paying customer. I've been telling everyone I know about getting one for their rigs!
 - Mike Stubblefield

The issue is in AC startup. Start-up is what gives inverters & generators a problem. I installed the EasyStart in my Atwood Air Command 13500 AC I had on the Ollie. The EasyStart solves this and a Honda 2000 runs my Dometic 15000 just fine, even on propane.
